Built in 1911 the Maverick Fire Station is a two story brick structure located on Billings southside. The 5,500 SF building originally housed Fire Station No. 2 and is the city’s oldest remaining fire station building.

Since the building was already listed on the National Register of Historic Places, the intent of the project was to restore the historical elements that has been removed, repair the areas which has started to deteriorate, and create new uses for the facility. The project has rejuvenated a part of Billing’s South Side District, and now houses office space on the first floor and two loft style apartments on the upper level.
